

Powder coatings

Compared to conventional paints the advantages of electro-static powder coatings are widespread. Hardness, adhesive properties, corrosion- temperature and chemical resistance are much higher than with conventional paints. Due to the electrostatic coating process difficult accessible areas can be coated. The perfect technical coating solution for safety clamps.

Safety clamps EN 14420-3 / FLEXOLINE

Standard	Safety clamps EN 14420-3 / FLEXOLINE
Material	Aluminium
Dimensions	ND 15 - ND 40 min. quantity 20 pcs ND 50 - ND 100 min. quantity 11 pcs ND 125 - ND 200 min. quantity 7 pcs
Finishing	Electrostatical powder coating
Advantages compared with traditional paints	Good mechanical resistant due to increased hardness Ozon resistant Pliable Good corrosion and temperature resistant Better chemical resistance 1 protective layer = 40-150 µm
Colors	RAL color range
Specials	Cam & Groove couplings, flange couplings etc.

Stainless steel and other thread types on request available.
